**PRACTICE WORKSHEET**

Name: \_\_\_\_\_ Date: \_\_\_\_\_

**PLANT LIFE**

Q1. Fill in the blanks.

- Name of the plant shown: \_\_\_\_\_
- Removal of parts from their body parts after they reach a certain age: \_\_\_\_\_
- Parts and structures responsible for: \_\_\_\_\_
- The seed because it is known as: \_\_\_\_\_
- The part of the embryo that grows into root is called: \_\_\_\_\_
- The farmers use \_\_\_\_\_ and \_\_\_\_\_ to make the soil fertile.

Q2. If you have a garden, what part of the plant would you plant to give a tree?

- Seedling
- Young plant
- Old plant
- Small plant
- Seedling plant
- Seedling plant
- Seedling
- Seedling

Q3. Draw and label the parts of the following plants.

- Onion
- Tomato

**Plant Life Cycle Video Questions**

Name: \_\_\_\_\_ Date: \_\_\_\_\_

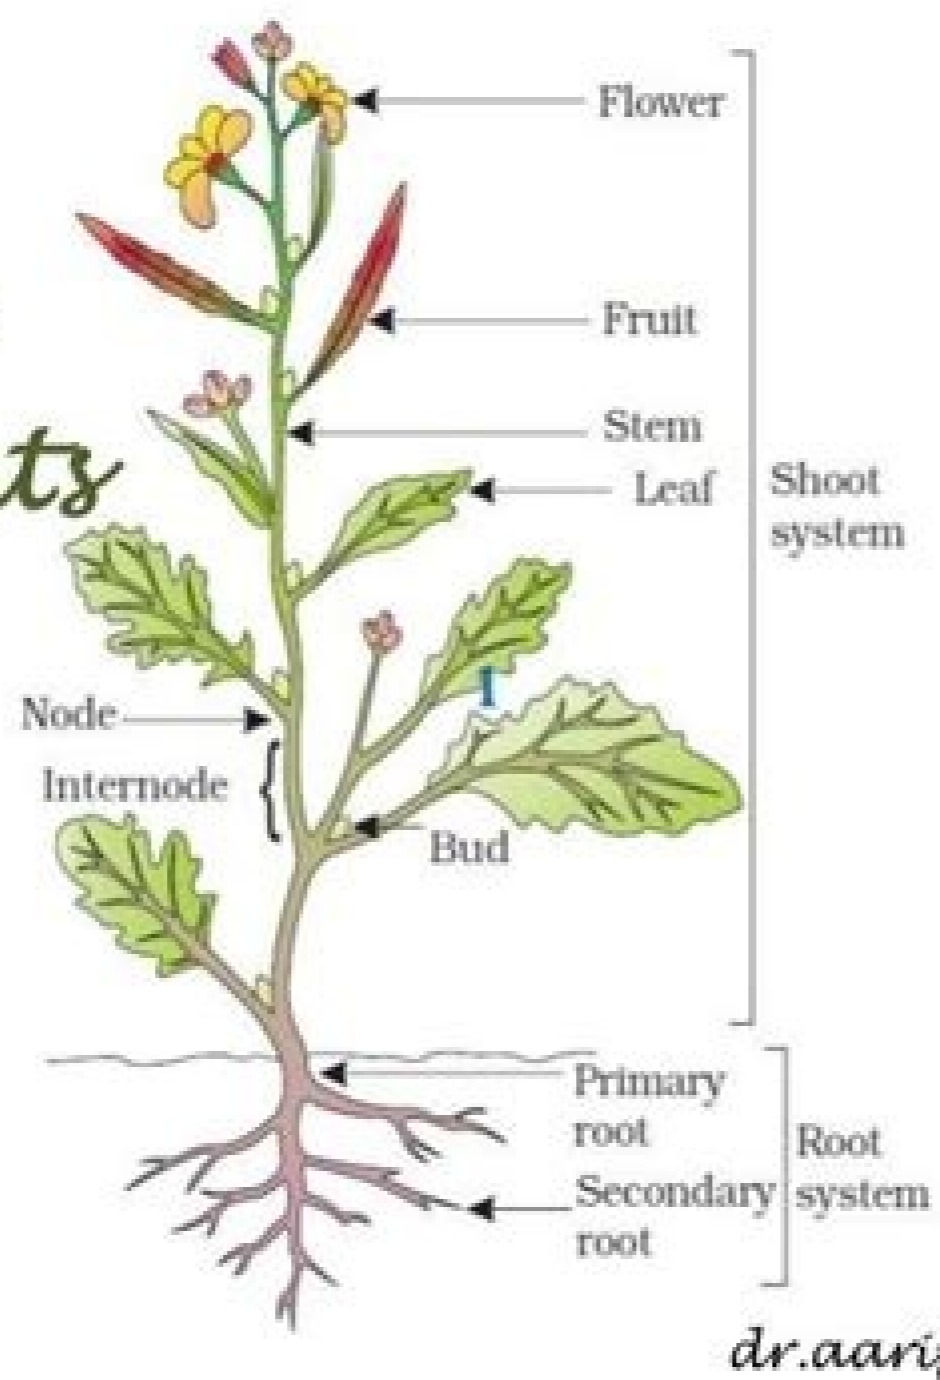

- Which of the following is the beginning of a plant's life cycle?
  - plants
  - seeds
  - beans
  - pumpkins
- A \_\_\_\_\_ is the different parts of a living thing's life as it grows and changes.
  - life cycle
  - plant
  - pumpkin
  - seed
- The outside of the dried seed is called the \_\_\_\_\_ and protects the seed.
  - seed jacket
  - seed shell
  - seed coat
  - dried seed

## Morphology of flowering plants

- Root
- Stem
- Leaf
- Flower
- Fruit
- Seed

Name: \_\_\_\_\_

### Plant Life Cycle

Directions: All plants create seeds to continue the plant's life cycle. Not all seeds look the same. Match each plant to its seed.

Score: 0% Rank: Correct Answer: Start Quiz >> CC BY-SA 2.0/wbaiv/Flickr Ground cover flowers represent an attractive alternative to lawns and extensive hard landscaping. Their leaves are small and evergreen, and their petals are a mix of pinks, blues and whites. When it flowers in April, the spiky white blossoms only add to its elegant appeal. CC BY 2.0/Muffet/Flickr Pig Squeak *Bergenia cordifolia* has a funny nickname that only really makes sense when you rub the leaves together and listen. During winter, you may need to move your light-loving plants away from windows and into a spot with a full-spectrum lamp that provides the brightness they need without the chillier air. Many houseplants are from tropical or subtropical areas, so they do best with higher humidity levels that mimic the conditions in the regions they come from. However, you can hang sheer curtains to create the softer, diffused light the Lemon Surprise loves. Its leaves often have a distinctive white stripe, and its flowers are pink or light magenta. In fact, it's one of the top houseplant options when it comes to hardiness, and it can withstand almost any conditions you provide. Photo Courtesy: KaiKamu/Moment/Getty Images Once you see how you like it and you get your caretaking program set, you can easily propagate heart leaf philodendrons. In fact, spider plants are so easy to care for that, before long, you might find that your plant is reproducing with minimal effort from you, which it does by sending out grassy shoots called spiderettes. Photo Courtesy: Veena Nair/Moment/Getty Images Once you have some spiderettes that are growing strongly, you might find that you want to place spider plants in other areas of your house or share them with friends. Fortunately, you can purchase houseplants online for convenient delivery right to your doorstep, keeping your new gardening endeavor as touch-free and COVID-safe as possible. Ventilation: Plants when there is good air circulation around them but they love the exchange of temperature that happens when they are sounding in unpleasant areas. If you want to download you have to send your contributions. Photo courtesy: @gardenknowhow/Twitter Bird's nest ferns have similar growth requirements to most ferns, but look slightly different with solid, solid leaves. These items can make a big difference as well as each plant does in your home. These climbing plants are delicate and elegant, with a beautiful winning character and broad, almost heart-shaped leaves. These green vases not only add color, character and cheer to your home, but they can also help purify the air you breathe and can also reduce stress levels. Depending on the area you live in, garden designers use perennial flowering plants for winter colour and summer transformations. You can trim them, put them in water until the roots sprout and plant them in well-drained soil to expand your indoor garden. *Dracaena* The striped leaves of this tropical plant add color and contrast almost everywhere in your home. Photo courtesy: Westend61/Getty Images Light: This is one of the most important considerations to think about for any plant, after all, is what plants get their energy from. *Richardia* *Flickr* Horned Violet Horned violet has blue and purple flowers with large circular petals. If this happens, transplant it into a larger vase with aerated soil. But with the new quarantine measures in place, you might hesitate to rush out to your local garden center and fill a cart with fantastic flora. To keep these dramatic tropical plants healthy, plan to report yours once a year until it reaches the size you want. Spider Plant If the Green is typically more on the brown and withered side, a spider plant can only be the type that is necessary to get some practice with the care of the plant. It fits well to areas from 6 to 11 and prefers the partial part or partial sun or shade. CC BY-SA 2.0/pejanum / flickr Japanese Pachysandra pachysandra *Terminalis* is also known as 'Spurgo'. It is a perennial evergreen with clear green leaves clearly edged. Here are some of the best flower terrain roofing plants to choose from. *Candytuft* *boris* *SemperVirens* is suitable for areas from 3 to 8 and, depending on where you live, it could prove to be evergreen in your climate. If the care requirements of your plant that prefers higher humidity levels, you can spray leaves using a spray bottle to provide this moisture more. Our collection grows every day with the help of many teachers. So it will almost equally well in a wet bathroom like the fern of the bird's nest heart leaf philodendron the wide leaves that curve up This plant easily earns its nickname. Before selecting your plants, walk through your home and understand points for them that best provide the conditions they prefer. It is a fan of humidity, but it can acclimatize quite well to the typical levels of housewife humidity if you remember to add humidity to the two-week intervals that the Swiss cheese factory prefers to as they grow, transplant them into pots Biggest every 12 to 18 months if smaller or their roots come through drain holes and every two years or down there if they have a larger profile. Swiss Cheese Plant (*Deliciosa Monstera*) If you like the appearance of tropical foliage and plants with a higher profile and less bush, Swiss cheese plants could be an ideal selection. The holes are rather resistant to high level and the duration of sunlight can tolerate the unlightened areas. Photo Granted: Jordan Lye / Moment / Getty Images Furthermore, while they love the moist soil rather than the wet or extremely dry conditions, they are tolerant more or less water than they prefer. Not they do without it (or with too much) for eneb escerc xolhp. 9 a 3 ad enoz el rep ottada. enoizarepoc aut al rep ellim eizarG. ecap ilg ehc atteridni e asonimul 'Aip eralos ecul alien otautis. Discover seven main options to design your own How to take care and select the best plants for your homeauna of the interesting plants of the plants is that they have their own personality A «or at least their preferences. It is suitable for zones 3 to 8 and grows at best in partial or complete shading. Increasing medium: what your plants grow in is important as it is what they develop around. This variety is particularly known for its quality purification qualities, which help keep things at home the most fresh possible. Photo Courtesy: Sara Monika / Image Source / Getty Images The Covid-19 pandemic has changed the way we live our daily life, especially when it comes to how and where we spend most of our time. You can do it by propagating them, which consists of cutting the colwobs from the main plant and put them, cut to face in down, in land jars. Felci Nido da e' Felci make a statement wherever you put them, especially for their remarkable width and The long feathered leaves, called fronds. These plants are prolific farmers, so you have to be careful that they don't get rooted. Different plants grow in different conditions, so it is essential to consider several physical factors of your home before starting the varietal selection. Surprisingly, these tropical beauties can do well in the coldest climates and, since naturally grow on the forest floors, they prefer filtered and indirect light. Some need a lot more light than others, and you will need to position them in different areas of your home to provide optimal light conditions so that they can thrive. Oranges, pink, yellow and red fire engine mix with more attenuated shades. Some plants, such as cactus and succulents, like the most coarse and well draining ground, while others are good with the most dense potting mixture. »Aeul »Aeul assab»A emoc etatehcite etnaip el ehcna ehc etadrocir e. asse rep otairporppa otosp nu ereva id ivarucissa rep asac a alratrop id amirp atnaip anu id ecul id itisuqer ia ataihccoaNu Deadnettle is a great choice for rocks and edges, especially for limiting weed growth. CC BY-SA 2.0/F. D. This means keeping our indoor spaces fresh is about to become more important than ever. CC BY 2.0/TANAKA Juuyoh (\_\_\_\_) /Flickr BugleweedAjuga reptans is a particularly popular strain of "bugleweed", known for its carpeting and carpeting spread. blue flowered ears. ... It grows well in various climates, tolerating zones 3 to 10, and is sometimes invasive. CC BY-SA 2.0/alex ranaldi/Flickr LithodoraThe diffuse Lithodora has almost blue flowers and grows well in warmer climates. CC BY-SA 2.0/Deivis/Flickr MORE INFORMATION FROM QUESTIONSANSWERED.NET Welcome to ESL Printables, the site where English language teachers exchange resources: worksheets, lesson plans, activities, etc. Ferns are also plants that grow in humidity, which is why they are often seen in the wild in the South, the Pacific Northwest and other humid climates. As the plant grows, it sends out the buds dangling like the spider plant. Some varieties remain in bloom from spring to autumn. CC BY-SA 2.0/wallygrom/Flickr Society GarlicThe company garlic, or "pink agapanth", is attractive, poorly preserved and even edible. However, it prefers bright shade and likes its soil to stay moist (not wet) most of the time. weather.
